

## 50 Ohm L-Band HTS

- **Standard 0-10km link**
- **65dB dynamic range for 500MHz traffic**
- **L-Band HTS (700-2450MHz)**
- **13/18V and 22KHz tone LNB option**
- **Blind mate option**
- **Standard 5 year warranty**

**ViaLiteHD** L-Band HTS fiber optic links have been designed for the satellite industry to transport RF signals between antennas and control rooms over fiber. Due to their very wide dynamic range, the same link can be used in both the transmit and receive paths. This dynamic range allows High Throughput Satellite (HTS) transponder bandwidths of 500MHz, 800MHz or even 1500MHz to be transported, as well as multiple standard 36MHz transponders.

The chassis mounted cards are available with the **VialiteHD** blind mate option, which allows all cables to be connected at the rear of the chassis when installed. It also allows any configuration changes to be completed without disturbing the connections and very fast changeover of cards, enabling five 9s reliability.

Options include:

- 50Ω electrical connectors: SMA & MCX
- Optical connectors: SC/APC, LC/APC, FC/APC & E2000/APC
- Test ports on Tx and Rx modules
- Built-in BiasT for LNB powering through RF connection
- LNB control circuit with 13/18VDC & 22kHz tone
- Blind mate connectivity (SC/APC and SMA)
- Serial digital channel to 20kb/s on same optical path

### Applications

Fixed satcom earth stations and teleports  
Broadcast facilities  
Mobile SNG, military and flyaways  
VSAT hubs (IP gateways)  
Marine antennas  
Telemetry, Tracking and Command (TT&C)  
Oil and gas platforms  
Television Receive-Only (TVRO)

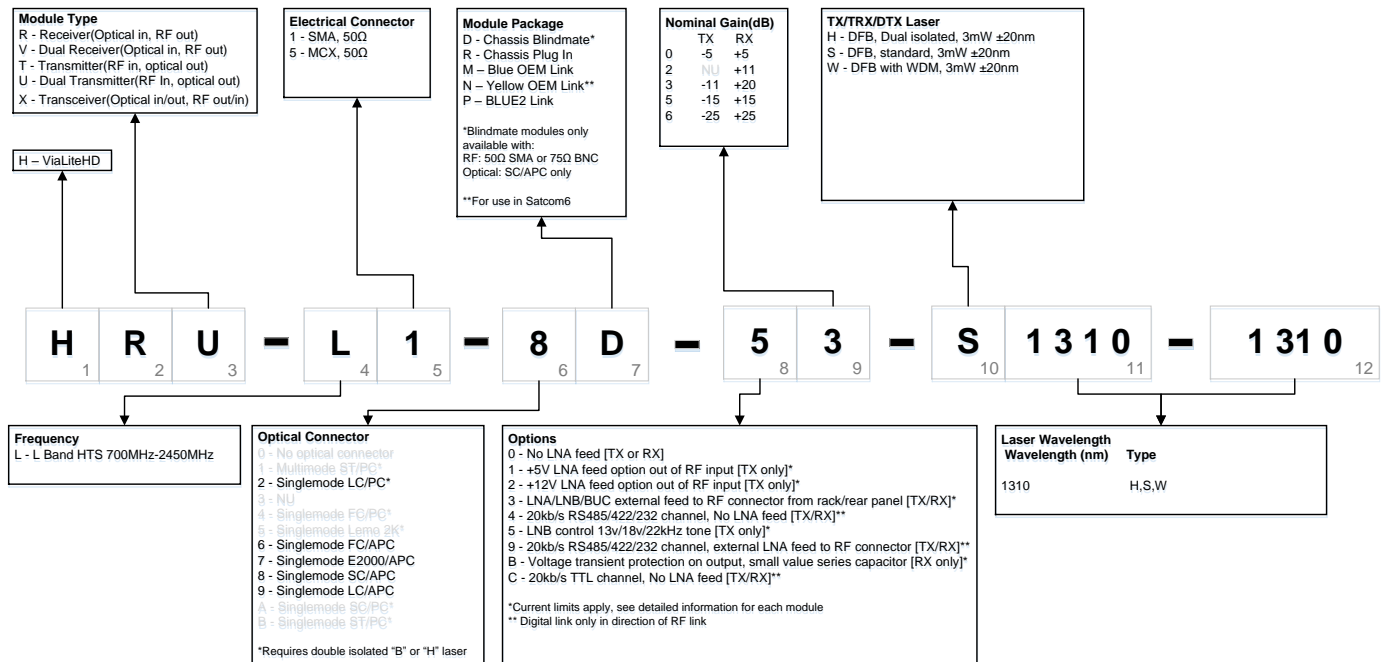

### Formats

3U Chassis  
1U Chassis  
Blue OEM and Blue2 Link  
Yellow OEM  
Outdoor enclosures
